DETAILED ACTION

Drawings

1. The replacement sheets of drawings filed August 12, 2005 have been approved for entry.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 19-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 20-25 of copending Application No. 10/710378. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations in claims 19-24 of the instant application are found in claims 20-25 of application 10/710378. In using a marine mooring line vermin shield as set forth in claims 20-25 of application 10/710378, one would be using a marine mooring line vermin shield as set forth in claims 19-24 of the instant application, and it would have been obvious at the time the

Application/Control Number: 10/604,526

Art Unit: 3617

invention was made to a person having ordinary skill in the art to which said subject matter pertains to do so. Motivation to do so is to keep vermin off of a boat.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

In claim 20 of application 10/710378, paragraph a, "a lockable element" is claimed as opposed to "a lock" claimed in claim 19 of the instant application; however, because a lock is a lockable element, the same invention is being claimed.

Allowable Subject Matter

- 4. Claims 1-12, 15 and 16 are allowed.
- 5. The following is a statement of reasons for the indication of allowable subject matter: Claim 1 is allowed over the art of record and the pending claims of application 10/710378 in view of the limitation "said closure second end is also sized and configured to removably engagably receive an aperture insert, said closure second end includes a closure retention snap void, said aperture insert includes a retention snap protrusion, wherein said void and said protrusion are removably interlockable being operational to removably retain said aperture insert on said closure second end, said aperture insert is adapted to partially compress the mooring line against said aperture when said closure is in the closed state".

Response to Arguments

6. Applicant's arguments filed August 12, 2005 with regard to claims 19-24 have been fully considered but they are not persuasive. Claims 20-25 of application 10/710378 include all of the limitations found in claims 19-24 of the instant application

and in addition include the added use of a fastener as argued by applicant. In using the vermin shield in the manner of claims 20-25 of application 10/710378, one having ordinary skill in the art would be using the vermin shield in the same manner claimed in claims 19-24 of the instant application and would have found it obvious to do so. For this reason, claims 19-24 are rejected with claims 20-25 of application 10/710378.

7. This new grounds of rejection is necessitated by applicant's amendment of claims 20-24 in application 10/710378.

Conclusion

8. Applicant's amendment in his copending application 10/710378 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
